

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): An information communication terminal apparatus for receiving a plurality of services, comprising:

 a service attribute determination part for determining an attribute of each of said plurality of services; and

 a service selection part for selecting a service to be used from among said plurality of services,

 wherein said service selection part excludes, from candidates for selection, any service whose attribute indicates that the service is a non-subscribed pay service, based on determination by said service attribute determination part.

2. (original): The information communication terminal apparatus according to claim 1, further comprising a search part for performing search processing of retrieving a receivable service from said plurality of services,

 wherein said search part excludes, from candidates for said search processing, any service whose attribute indicates that the service is a non-subscribed pay service, based on determination by said service attribute determination part.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

3. (original): The information communication terminal apparatus according to claim 1, further comprising a preset part for performing preset processing of extracting a receivable service from said plurality of services, and assigning a predetermined preset button to a information for obtaining said receivable service,

wherein said preset part excludes, from candidates for said preset processing, any service whose attribute indicates that the service is a non-subscribed pay service, based on determination by said service attribute determination part.

4. (original): The information communication terminal apparatus according to claim 1, further comprising an information display part for performing information display processing of displaying information regarding a title and a content of each of said plurality of services, wherein said information display part excludes, from candidates for said information display processing, any service whose attribute indicates that the service is a non-subscribed pay service, based on determination by said service attribute determination part.

5. (original): An information communication terminal apparatus for receiving a plurality of services, comprising:

a service attribute determination part for determining an attribute of each of said plurality of services; and

a service selection part for selecting a service to be used from among said plurality of services,

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

wherein said service selection part includes, as a candidate for selection, only a service whose attribute indicates that the service is a free service, based on determination by said service attribute determination part.

6. (original): The information communication terminal apparatus according to claim 5, further comprising a search part for performing search processing of retrieving a receivable service from said plurality of services,

wherein said search part includes, as a candidate for said search processing, only a service whose attribute indicates that the service is a free service, based on determination by said service attribute determination part.

7. (original): The information communication terminal apparatus according to claim 5, further comprising a preset part for performing preset processing of extracting a receivable service from said plurality of services, and assigning a predetermined preset button to a information for obtaining said receivable service,

wherein said preset part includes, as a candidate for said preset processing, only a service whose attribute indicates that the service is a free service, based on determination by said service attribute determination part.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

8. (original): The information communication terminal apparatus according to claim 5, further comprising an information display part for performing information display processing of displaying information regarding a title and a content of each of said plurality of services, wherein said information display part includes, as a candidate for said information display processing, only a service whose attribute indicates that the service is a free service, based on determination by said service attribute determination part.

9. (original): An information communication terminal apparatus for receiving a plurality of services, comprising:

a service attribute determination part for determining an attribute of each of said plurality of services; and

a service selection part for selecting a service to be used from among said plurality of services,

wherein said service selection part includes, as a candidate for selection, only a service whose attribute indicates that the service is a subscribed pay service, based on determination by said service attribute determination part.

10. (original): The information communication terminal apparatus according to claim 9, further comprising a search part for performing search processing of retrieving a receivable service from said plurality of services,

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

wherein said search part includes, as a candidate for said search processing, only a service whose attribute indicates that the service is a subscribed pay service, based on determination by said service attribute determination part.

11. (original): The information communication terminal apparatus according to claim 9, further comprising a preset part for performing preset processing of extracting a receivable service from said plurality of services, and assigning a predetermined preset button to a information for obtaining said receivable service,

wherein said preset part includes, as a candidate for said preset processing, only a service whose attribute indicates that the service is a subscribed pay service, based on determination by said service attribute determination part.

12. (original): The information communication terminal apparatus according to claim 9, further comprising an information display part for performing information display processing of displaying information regarding a title and a content of each of said plurality of services,

wherein said information display part includes, as a candidate for said information display processing, only a service whose attribute indicates that the service is a subscribed pay service, based on determination by said service attribute determination part.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

13. (original): The information communication terminal apparatus according to claim 1, further comprising a search part for performing search processing of retrieving a non-subscribed pay service from said plurality of services,

wherein said search part excludes, from candidates for said search processing, any service whose attribute indicates that the service is one of a subscribed pay service and a free service, based on determination by said service attribute determination part.

14. (new): The information communication terminal apparatus according to claim 1, wherein said attribute of each of said plurality of services can be uniquely determined based on a service number.

15. (new): The information communication terminal apparatus according to claim 14, wherein said service number comprises a header bit of data stored in a memory.

16. (new): The information communication terminal apparatus according to claim 1, wherein received service search identifiers identify said attributes of said plurality of services.

17. (new): The information communication terminal apparatus according to claim 16, wherein said receiver service search identifiers identify headers of each service based on detection of a bit value.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

18. (new): The information communication terminal apparatus according to claim 3, wherein said preset button is assigned to a highest priority service.

19. (new): The information communication terminal apparatus according to claim 3, wherein said preset button is assigned to a highest reception quality service.

20. (new): An information communication terminal apparatus, comprising:
an identifier indicating a desired service attribute;
a memory storing a plurality of received services and associated attributes;
a candidate selector selecting as a candidate selection set, at least one of said plurality of received services; and
a service selector selecting at least one desired service from said candidate selection set;
wherein an attribute of each of the received services in said candidate selection set corresponds to said desired service attribute.

21. (new): The apparatus of claim 20, wherein non-subscribed pay services are excluded from said candidate selection set.

22. (new): The apparatus of claim 20, wherein said candidate selection set includes only free services.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

23. (new): The apparatus of claim 20, wherein said candidate selection set includes only subscribed pay services.

24. (new): The apparatus of claim 20, further comprising a preset processor which assigns predetermined preset buttons to information for extracting each of said at least one desired service.

25. (new): The apparatus of claim 20, wherein said service selector selects said at least one desired service based on reception level and error rate.

26. (new): The apparatus of claim 20, wherein said received services and associated attributes are stored in a received service attribute table.

27. (new): A method of receiving services, comprising:
identifying a desired service attribute;
storing a plurality of received services and associated attributes;
selecting a candidate selection set of at least one of said stored plurality of received services; and
selecting at least one desired service from said candidate selection set;
wherein an attribute of each of the received services in said candidate selection set corresponds to said desired service attribute.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/927,905
Attorney Docket No. Q65759

28. (new): The method of claim 27, further comprising excluding non-subscribed pay services from said candidate selection set.

29. (new): The method of claim 27, wherein said candidate selection set includes only free services.

30. (new): The method of claim 27, wherein said candidate selection set includes only subscribed pay services.

31. (new): The method of claim 27, further comprising assigning predetermined preset buttons to recall information for extracting each of said at least one desired service.

32. (new): The method of claim 27, wherein said selecting at least one desired service is based on reception level and error rate.

33. (new): The method of claim 27, wherein said received services and associated attributes are stored in a received service attribute table.
